Subject Index

Accident
Hazardous substance, Transport emergency planning, 395–405
Aerosol
Release, Loss prevention, 234–243
Ammonia
Toxic, Gas, 197–206
Analysis
Fault tree analysis, Modelling, 386–394
Assessment
Hazard, Fire, 349–354

BLEVE
Flame front, Probit methods, 150–155
Book Reviews
Grossel, S. S., 334, 410, 411
Tweeddale, M., 410

Case Histories
Kletz, T., 263, 409
Roberts, A., 332–333
Catastrophic failure
Explosion, Pressure vessels, 64–67
Chemical hazard
Release, Health effects, 167–176
Thermal radiation, Modelling, 244–252
Comment
Viney, M., 266–267
Concept
Hazard analysis, Loss prevention, 321–326
Containment
Relief devices, Loss prevention, 112–124
Two-phase flow, Gas, 130–135
Containment system
Puncture, Dense gas cloud, 104–111
Control
Productivity, Modelling, 330–332
Control systems
Reliability, Release, 212–221
Corrosive
Hazard, Sulphur trioxide, 177–184
Cracks
Flashing flow, Pipework layout, 17–26

Dense gas
Release, Plume, 82–87
Dense gas cloud
Puncture, Containment system, 104–111
Discharge
Hazard, Electrostatic, 381–385
Design principles
Two-phase flow, Flashing flow, 27–32
Detonation
Hazard, Thermodynamics, 311–320
Dispersion
Gas, Modelling, 142–145
Modelling, Jets, 91–96
Dust
Vents, Explosion, 268–279

Electrostatic
Hazard, Discharge, 381–385
Emissivity
Puncture, Modelling, 33–37
Explosion
Fire, Toxic, 146–149
Gas, Flame speed, 355–364
Gas, Modelling, 365–369
Gas, Vents, 345–348
Pressure vessels, Catastrophic failure, 64–67
Pressure vessels, Flow blockage, 291–302
Vents, Dust, 268–279

Fault tree analysis
Modelling, Analysis, 386–394
Fire
Explosion, Toxic, 146–149
Hazard, Assessment, 349–354
Flame front
Probit methods, BLEVE, 150–155
Flame speed
Explosion, Gas, 355–364
Flashing flow
Pipework layout, Cracks, 17–26
Pressure vessels, Modelling, 303–310
Two-phase flow, Design principles, 27–32
Two-phase flow, Modelling, 253–260
Flow blockage
Explosion, Pressure vessels, 291–302

Gas
Containment, Two-phase flow, 130–135
Dispersion, Modelling, 142–145
Explosion, Flame speed, 355–364
Explosion, Modelling, 365–369
Explosion, Vents, 345–348
Pressure vessels, Process choice, 59–63
Toxic, Ammonia, 197–206
Two-phase flow, Modelling, 38–42
Gas cloud
Pressure vessels, Release, 88–90

Hazard
Corrosive, Sulphur trioxide, 177–184
Detonation, Thermodynamics, 311–320
Electrostatic, Discharge, 381–385
Fire, Assessment, 349–354
Pressure vessels, Physical processes, 4–7
Release, Risk, 136–141
Risk, LPG, 406–408
Toxic, Hydrogen, 339–344
Hazard analysis
Loss prevention, Concept, 321–326
Hazardous substance
Transport emergency planning, Accident, 395–405
Health effects
Chemical hazard, Release, 167–176
Hydrogen
Hazard, Toxic, 339–344

Jets
Dispersion, Modelling, 91–96
Toxicity, Wind speed, 68–76

Loss prevention
Hazard analysis, Concept, 321–326
Release, Aerosol, 234–243
Release, Two-phase flow, 97–103
Release, Water spray, 207–211, 222–233
Relief devices, Containment, 112–124
Relief devices, Pressure system design, 125–129
LPG
Risk, Hazard, 406–408

Modelling
Chemical hazard, Thermal radiation, 244–252
Dispersion, Jets, 91–96
Fault tree analysis, Analysis, 386–394
Gas, Dispersion, 142–145
Gas, Explosion, 365–369
Peak pressure, Sonic, 370–380
Pressure vessels, Flashing flow, 303–310
Productivity, Control, 330–332
Puncture, Emissivity, 33–37
Release, Vapour barrier, 187–196
Release, Wind speed, 280–290
Relief devices, Multiphase flow, 43–49
Two-phase flow, Flashing flow, 253–260
Two-phase flow, Gas, 38–42
Vents, Vapour generation, 8–12
Vents, Viscosity, 50–52
Monomethylamine
Release, Storage areas, 77–81
Multiphase flow
Modelling, Relief devices, 43–49

Overpressure
Pressure vessels, Vents, 53–58

Peak pressure
Modelling, Sonic, 370–380
Physical processes
Pressure vessels, Hazard, 4–7
Pipework layout
Flashing flow, Cracks, 17–26
Plume
Release, Dense gas, 82–87
Pressure burst
Explosion, Spark, 261–263
Pressure system design
Relief devices, Loss prevention, 125–129
Pressure vessels
Explosion, Catastrophic failure, 64–67
Explosion, Flow blockage, 291–302
Gas cloud, Release, 88–90
Hazard, Physical processes, 4–7
Modelling, Flashing flow, 303–310
Overpressure, Vents, 53–58
Process choice, Gas, 59–63
Vents, Viscosity, 13–16
Probit methods
Flame front, BLEVE, 150–155
Process choice
Pressure vessels, Gas, 59–63
Productivity
Modelling, Control, 330–332
Puncture
Containment system, Dense gas cloud, 104–111
Modelling, Emissivity, 33–37

Release
Chemical hazard, Health effects, 167–176
Gas cloud, Pressure vessels, 88–90
Hazard, Risk, 136–141
Loss prevention, Aerosol, 234–243
Loss prevention, Two-phase flow, 97–103
Loss prevention, Water spray, 207–211, 222–233
Modelling, Vapour barrier, 187–196
Modelling, Wind speed, 280–290
Plume, Dense gas, 82–87
Reliability, Control systems, 212–221
Risk assessment, Two-phase flow, 156–166
Storage areas, Monomethylamine, 77–81
Reliability
Control systems, Release, 212–221
Relief devices
Containment, Loss prevention, 112–124
Modelling, Multiphase flow, 43–49
Pressure system design, Loss prevention, 125–129
Risk
Hazard, LPG, 406–408
Release, Hazard, 136–141
Risk assessment
Release, Two-phase flow, 156–166

Sonic
Modelling, Peak pressure, 370–380
Spark
Explosion, Pressure burst, 261–263
Storage areas
Release, Monomethylamine, 77–81
Sulphur trioxide
Corrosive, Hazard, 177–184

Target object geometry
View factor, Thermal radiation, 327–329
Thermal radiation
Chemical hazard, Modelling, 244–252
View factor, Target object geometry, 327–329
Thermodynamics
Hazard, Detonation, 311–320
Toxic
Explosion, Fire, 146–149
Gas, Ammonia, 197–206
Hazard, Hydrogen, 339–344
Toxicity
Wind speed, Jets, 68–76
Transport emergency planning
Hazardous substance, Accident, 395–405
Two-phase flow
Containment, Gas, 130–135
Flashing flow, Design principles, 27–32
Flashing flow, Modelling, 253–260
Gas, Modelling, 38–42
Release, Loss prevention, 97–103
Risk assessment, Release, 156–166

Vapour barrier
Release, Modelling, 187–196
Vapour generation
Vents, Modelling, 8–12
Vents
Explosion, Dust, 268–279
Gas, Explosion, 345–348
Modelling, Vapour generation, 8–12
Modelling, Viscosity, 50–52
Pressure vessels, Overpressure, 53–58
Pressure vessels, Viscosity, 13–16
View factor
Thermal radiation, Target object geometry, 327–329
Viscosity
Vents, Pressure vessels, 13–16
Vents, Modelling, 50–52

Water spray
Release, Loss prevention, 207–211, 222–233
Wind speed
Release Modelling, 280–290
Toxicity, Jets, 68–76
